Iqbal Gujjar St, Gulshan Yaseen Colony, Lahore, Punjab, Pakistan

OBJECTIVE

To secure a challenging position as a Web Developer where I can apply my expertise in developing scalable, high-performance web applications, writing clean and maintainable code, and utilizing SOLID principles and design patterns to deliver robust, enterprise-grade software solutions that contribute meaningfully to organizational success.

SKILLS

Technical Skills: ASP.NET Core, RESTful API, ADO.NET, Dapper, Angular, JavaScript, TypeScript, Oracle, SQL Server, Git, Tailwind CSS

Soft Skills: Team Collaboration, Problem Solving, Quick Learner, Logic Building

EXPERIENCE AND PROJECTS

FINTECHTIK

.NET (Internship)

Currently undertaking a hands-on internship in .NET technology at Fintechtik, a software house based in Township. Gaining practical experience in backend development using C# and ASP.NET, while contributing to real-world projects in a collaborative, agile environment. Actively enhancing skills in database management, API development, and software design principles.

Stock Management System

Tech Stack: ASP.NET (Dapper), Angular with Ionic

Developed a robust Stock Management System with a clean separation of concerns. Implemented backend APIs using ASP.NET with Dapper for fast, efficient database interactions. Designed and integrated a dynamic, mobile-responsive frontend using Angular with Ionic for seamless user experience. Core features included inventory tracking, stock in/out transactions, unit management, and real-time reporting.

E-commerce Website

PHP Laravel (Blade MVC)

I have successfully developed multiple e-commerce websites, leveraging Laravel for robust backend functionality and utilizing HTML, CSS, JavaScript, jQuery, and Bootstrap to create engaging and responsive front-end user interfaces. Notably, I developed and deployed Bahtareen.com and Onglen.com, both hosted on Hostinger, showcasing my expertise in end-to-end web development.

ConnectUS (FYP project)

Reactjs using Typescript (MERN)

Developed a web application connecting university students with software Houses for internships or Job. It is similar with LinkedIn but the main difference is that its take a mock test to examine the skills of the students and it also provides a live chat functionality using Socket.io for live changings. Utilized React.js and Tailwind CSS for the frontend, and Node.js, TypeScript, and MongoDB for the backend.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science

Minhaj University Lahore

CGPA: 3.27

- Object Oriented Programming (OOPs)
- Data structures & Algorithms
- Database Systems
- Machine Learning
- Artificial Intelligence
- Mobile Application Development
- Web Technologies

LIVE PROJECT

onglen.com

Web Developer

2024-continue

Developed and launched onglen.com, a dynamic e-commerce platform. Utilized PHP(Laravel 11) and MySQL for a robust backend, and crafted an engaging, responsive user interface with HTML, CSS, JavaScript, and Bootstrap. Ensured seamless functionality and an exceptional user experience.

Projects Completed During Academic Studies

Go Drive (Ridesharing App)

Flutter with GoogleMaps integration

An app like uber and indrive I have Developed a ridesharing app using flutter with firebase integration and also use google map API integration.

Chat System

Flutter with Firebase integration

I have developed a live chat App as my semester project in Flutter with firebase integration I is similar to Whatsapp but I make some changings in it like authentication with gmail etc.
